

### **Angles Math Test: Things to know**

- 1) Identify angles as either acute, right, obtuse, reflex
- 2) Draw a reference angle without using a protractor
- 3) Estimate the measure of angles, without a protractor (use reference angles)
- 4) Measure angles with a protractor
- 5) Describe the steps used to draw an angle.
- 6) Know how to draw an angle
- 7) Know how to solve problems where you know 2 of the three angles of a triangle  
Know how to show work, using the formulas.
- 8) Know how to solve problems where you know 3 of the 4 angles of a quadrilateral  
Know how to show work, using the formulas.

### **Format of the test:**

- Written questions
-
